Professional Summary

Senior Software Engineer with 19+ years of experience across full-stack, frontend, product engineering, and a recent focus on customer-facing Applied AI solutions.

I work directly with customers and stakeholders to turn ambiguous operational problems into practical AI systems, spanning discovery, requirements, integrations, retrieval, agents, APIs, and user-facing applications.

I bridge product discovery and hands-on delivery, adapting solutions to existing workflows and organizational data while applying senior engineering judgment across system boundaries and technical trade-offs.

FOCUS AREAS

- Customer-facing Applied AI and solutions engineering
- Discovery, requirements definition, and stakeholder collaboration
- AI agent deployments and workflow integration
- RAG, document retrieval, and organizational knowledge systems
- APIs, authenticated MCP, and system integrations

Skills

Customer Discovery

Requirements Definition

Stakeholder Collaboration

Solution Architecture

Hermes Agent

AI Agent Integration

Retrieval-Augmented Generation (RAG)

Document Retrieval

Model Context Protocol (MCP)

Authentication & Authorization

API Design & Integration

System Design

TypeScript

JavaScript

Node.js

React

Next.js

Mastra

LangGraph

PostgreSQL & pgvector

Experience

Independent Product R&D & AI Consulting

Apr 2026 – Present

Senior Software Engineer — Applied AI & Solutions

- Partnered directly with Juana Casa's two founding partners and studio team to discover project and operational knowledge needs, scope an appropriate solution, and translate ambiguous requirements into an end-to-end AI system.
 - Implemented specialized AI agents using Hermes Agent and integrated them into the studio's Slack and WhatsApp workflows, giving the team conversational access to organizational knowledge and operational data.
 - Developing a reusable source-backed RAG and authenticated MCP integration layer that connects AI assistants and agents with company documents and structured operational data.
 - Built and maintain **Hermes Dreaming**, an open-source Python plugin for Hermes Agent that consolidates long-term memory through scheduled, reviewable agent workflows with persistent state and lifecycle tooling.
-

Rotunda Software

Apr 2022 – Apr 2026

Senior Frontend Engineer · Remote

- Collaborated with backend, design, QA, and marketing to define technical and product solutions, implementing features from Figma designs and proactively identifying UX and implementation improvements.
 - Worked within a microservices-based architecture using a custom internal frontend framework, implementing Node.js and Express API endpoints to support frontend features.
 - Improved frontend tooling and local development workflows, reducing friction for the engineering team.
 - Drove large-scale frontend refactors, including migrations of multiple applications and marketing sites.
 - Acted as the main frontend reference across the team, supporting developers in UI-related decisions and implementation.
 - Led the evolution of the internal UI library (ModUI), improving APIs, simplifying styling systems, and increasing consistency.
-

BairesDev

Mar 2020 – Mar 2022

Senior Frontend Engineer · Remote

- Expanded into backend responsibilities, learning Go and implementing APIs to deliver features end to end.
 - Collaborated in distributed teams and participated in code reviews and testing.
 - Worked on Pinterest's Experiments team, implementing and testing React UI variations in the core consumer product to support product experimentation.
 - Developed and owned the UI layer of internal advertising reporting tools, defining their information architecture and data presentation.
-

Mapme

Nov 2016 – Dec 2019

Senior Frontend Engineer · Remote

- Collaborated closely with the CTO and CEO, translating business needs into practical, user-friendly UI solutions, often without formal designs.
 - Helped evaluate and introduce Vue.js for a full product rewrite, then led the frontend implementation of the redesigned application from scratch.
 - Built a component-based architecture with Vue and Vuex, including reusable UI components designed for maintainability and scalability.
-

Deviget

Dec 2013 – Apr 2016

Frontend Developer · Remote

- Worked on a large-scale advertising platform (AppNexus).
 - Built modular UI components using AngularJS with strong testing practices.
 - Contributed to frontend structure improvements and CSS organization.
 - Participated in Style Guide development.
 - Collaborated in distributed cross-functional teams.
 - After AppNexus, built a React-based administration UI for corporate security policies for another client engagement.
-

Vulsai

2012 – 2013

Frontend Developer · Buenos Aires, AR

- Primary frontend developer across multiple projects.
 - Introduced modern CSS tooling (Sass, Less, Compass), improving maintainability and structure of styles.
 - Built data visualization interfaces using D3.js.
 - Developed self-contained embeddable widgets.
 - Collaborated closely with design.
-

Earlier full-stack experience across four roles building web applications end-to-end with frontend, backend, APIs, databases, and infrastructure.
