About

Senior Software Engineer with 19+ years of experience building and evolving web products, with a strong focus on technical leadership, product thinking, system design, and AI-assisted workflows.

I work at the intersection of business, product, and engineering—collaborating with stakeholders, translating complex needs into practical technical solutions, identifying trade-offs, and helping cross-functional teams move from ambiguity toward execution.

My recent work focuses on AI systems, workflow automation, integrations, and turning operational processes into software; I'm now seeking a Technical Project Manager opportunity where I can combine that engineering depth with product, requirements, and AI systems delivery.

INTERESTS

- Technical project and product delivery for complex software systems
- AI systems, workflow automation & process improvement
- Business-to-technical requirements translation
- System architecture, integrations & technical decision-making
- Roles combining engineering depth with project and product ownership

Skills

Technical Delivery

Business-to-Technical Translation

Stakeholder Collaboration

Cross-functional Coordination

Requirements Discovery & Definition

Experience

Independent Product R&D & AI Consulting

Apr 2026 – Present

Senior Software Engineer — Technical Product & AI Systems

- Worked directly with Juana Casa's two founding partners and members of the studio team as key stakeholders, clarifying operational knowledge-access needs, defining requirements, and translating them into an initial React/Next.js assistant with Mastra and RAG.
 - Defined the product and technical direction as the work evolved into Ground, translating stakeholder needs into scope, system boundaries, and an integration approach spanning grounded RAG, authenticated MCP access, and specialized Workspace Agents through Slack and WhatsApp.
 - Drove delivery from discovery and prototyping through implementation, testing, and review, using AI-assisted workflows while keeping decisions and outputs explicitly human-verified.
 - Designed and carried out a staged Quorum research initiative across 14 multi-model workflows and multiple providers, balancing quality hypotheses with cost, latency, integration, and exploratory evaluation constraints.
-

Rotunda Software

Apr 2022 – Apr 2026

Senior Frontend Engineer · Remote

- Acted as the main frontend reference across the team, supporting developers in UI-related decisions and implementation.
 - Collaborated with backend, design, QA, and marketing to define technical and product solutions, proactively identifying UX and implementation improvements.
 - Drove large-scale frontend refactors, including migrations of multiple applications and marketing sites.
 - Led the evolution of the internal UI library (ModUI), improving APIs, simplifying styling systems, and increasing consistency.
 - Worked within a microservices-based architecture using a custom internal frontend framework, implementing Node.js and Express API endpoints to support frontend features.
-

BairesDev

Mar 2020 – Mar 2022

Senior Frontend Engineer · Remote

- Worked on Pinterest's Experiments team, implementing and testing React UI variations in the core consumer product to support product experimentation.
 - Developed and owned the UI layer of internal advertising reporting tools, defining their information architecture and data presentation.
 - Expanded into backend responsibilities, learning Go and implementing APIs to deliver features end to end.
 - Collaborated in distributed teams and participated in code reviews and testing.
-

Mapme

Nov 2016 – Dec 2019

Senior Frontend Engineer · Remote

- Collaborated closely with the CTO and CEO, translating business needs into practical, user-friendly UI solutions, often without formal designs.
 - Helped evaluate and introduce Vue.js for a full product rewrite, then led the frontend implementation of the redesigned application from scratch.
 - Built a component-based architecture with Vue and Vuex, including reusable UI components designed for maintainability and scalability.
-

Deviget

Dec 2013 – Apr 2016

Frontend Developer · Remote

- Worked on a large-scale advertising platform (AppNexus).
 - Built modular UI components using AngularJS with strong testing practices.
 - Contributed to frontend structure improvements and CSS organization.
 - Participated in Style Guide development.
 - Collaborated in distributed cross-functional teams.
 - After AppNexus, built a React-based administration UI for corporate security policies for another client engagement.
-

Vulsai

2012 – 2013

Frontend Developer · Buenos Aires, AR

- Primary frontend developer across multiple projects.
 - Introduced modern CSS tooling (Sass, Less, Compass), improving maintainability and structure of styles.
 - Built data visualization interfaces using D3.js.
 - Developed self-contained embeddable widgets.
 - Collaborated closely with design.
-

Earlier full-stack experience across four roles building web applications end-to-end with frontend, backend, APIs, databases, and infrastructure.
