Professional Summary

Senior Software Engineer with 19+ years of experience across frontend, full-stack, product engineering, and Applied AI. Now focused on customer-facing AI solutions, working directly with stakeholders to turn ambiguous operational problems into practical systems spanning discovery, integrations, retrieval, agents, APIs, and user-facing applications.

FOCUS AREAS

- Customer-facing Applied AI engineering
- AI agent integrations & workflows
- RAG & organizational knowledge systems
- APIs, MCP & business-system integrations
- Product discovery & stakeholder collaboration
- End-to-end AI product delivery

Skills

TypeScript JavaScript Node.js React Next.js REST APIs API Design & Integration
Model Context Protocol (MCP) Retrieval-Augmented Generation (RAG) PostgreSQL pgvector
Mastra LangGraph Hermes Agent AI Agents & Tool Use Git

Experience

Independent Product R&D & AI Consulting

Apr 2026 – Present

Senior Software Engineer — Applied AI & Solutions

- Partnered directly with the two founding partners and team of an architecture studio to discover project and operational knowledge needs, scope an appropriate solution, and translate ambiguous requirements into an end-to-end AI system.
- Implemented specialized AI agents using Hermes Agent and integrated them into the studio's Slack and WhatsApp workflows, enabling conversational access to organizational knowledge and supporting operational workflows.
- Developing a reusable source-backed RAG and authenticated MCP integration layer that connects AI assistants and agents with company documents and structured operational data.
- Iterated directly with stakeholders on requirements, workflows, integrations, and product behavior as the solution evolved from prototype toward operational use.
- Built and maintain **Hermes Dreaming**, an open-source memory-consolidation plugin for Hermes Agent, using AI-assisted engineering to work with its plugin and tool APIs, scheduled execution, persistent state, and configurable memory operations.

Rotunda Software

Apr 2022 – Apr 2026

Senior Frontend Engineer · Remote

- Collaborated with backend, design, QA, and marketing to define technical and product solutions, implementing features from Figma designs and proactively identifying UX and implementation improvements.
- Worked within a microservices-based architecture using a custom internal frontend framework, implementing Node.js and Express API endpoints to support frontend features.
- Improved frontend tooling and local development workflows, reducing friction for the engineering team.
- Drove large-scale frontend refactors, including migrations of multiple applications and marketing sites.
- Acted as the main frontend reference across the team, supporting developers in UI-related decisions and implementation.
- Led the evolution of the internal UI library (ModUI), improving APIs, simplifying styling systems, and increasing consistency.

BairesDev

Mar 2020 – Mar 2022

Senior Frontend Engineer · Remote

- Expanded into backend responsibilities, learning Go and implementing APIs to deliver features end to end.
- Collaborated in distributed teams and participated in code reviews and testing.
- Worked on Pinterest's Experiments team, implementing and testing React UI variations in the core consumer product to support product experimentation.
- Developed and owned the UI layer of internal advertising reporting tools, defining their information architecture and data presentation.

Mapme

Nov 2016 – Dec 2019

Senior Frontend Engineer · Remote

- Collaborated closely with the CTO and CEO, translating business needs into practical, user-friendly UI solutions, often without formal designs.
- Helped evaluate and introduce Vue.js for a full rewrite of a Mapbox GL map-based product, then led the frontend implementation of the redesigned application from scratch.
- Built a component-based architecture with Vue and Vuex, including reusable UI components designed for maintainability and scalability.

Deviget

Dec 2013 – Apr 2016

Frontend Developer · Remote

- Worked on a large-scale advertising platform (AppNexus).
- Built modular UI components using AngularJS with strong testing practices.
- Contributed to frontend structure improvements and CSS organization.
- Participated in Style Guide development.
- Collaborated in distributed cross-functional teams.
- After AppNexus, built a React-based administration UI for corporate security policies for another client engagement.

Vulsai

2012 – 2013

Frontend Developer · Buenos Aires, AR

- Primary frontend developer across multiple projects.
- Introduced modern CSS tooling (Sass, Less, Compass), improving maintainability and structure of styles.
- Built data visualization interfaces using D3.js.
- Developed self-contained embeddable widgets.
- Collaborated closely with design.

Earlier full-stack experience across four roles building web applications end-to-end with frontend, backend, APIs, databases, and infrastructure.
