Professional Summary

Senior Software Engineer with 19+ years of experience, starting in full-stack web development before specializing deeply in frontend architecture, JavaScript/TypeScript, React, and production UI systems.

My work has grown increasingly product-oriented: I collaborate closely with Product and Design, translate ambiguous needs into practical solutions, and take end-to-end ownership across UX, architecture, implementation, APIs, and technical trade-offs.

More recently, I have focused on Applied AI systems and AI-powered products, building retrieval and agent workflows, integrations, evals, and multi-model experiments on top of a broad software engineering foundation.

FOCUS AREAS

- Product-focused software engineering and end-to-end ownership
- Frontend architecture, UI systems & design systems
- Applied AI products, retrieval & agent workflows
- System design, APIs & integrations
- Senior Software Engineering roles spanning Frontend, Product & Applied AI

Skills

Frontend Architecture · Full-stack Development · React · TypeScript · JavaScript · Design Systems · System Design · Product & UX Collaboration · Technical Leadership · Requirements Definition · Node.js · API Design & Integration · Retrieval-Augmented Generation (RAG) · Hybrid Search & Reranking · AI Agents · MCP Integrations · LangGraph · Mastra · AI Evaluation & Benchmarking · AI-assisted Development Workflows

Experience

Independent Product R&D & AI Consulting

Apr 2026 – Present

Senior Software Engineer — Product & Applied AI

- Partnered with Juana Casa's two founding partners and studio team to translate project and operational knowledge needs into a React/Next.js AI assistant with Mastra, source-backed RAG, and specialized agents built with Hermes Agent and integrated with Slack and WhatsApp.
- Developing an independent knowledge-intelligence layer for companies based on that real-world problem, combining vector and full-text retrieval, reciprocal-rank fusion, reranking, bounded multi-hop retrieval, evaluation, and authenticated MCP access to company documents and structured operational data.
- Built and maintain **Hermes Dreaming**, an open-source Python memory-consolidation plugin for Hermes Agent with scheduled, reviewable workflows, persistent state, and lifecycle tooling.
- Built an experimental LangGraph research lab for multi-model inference across multiple providers, implementing 14 orchestration workflows—including mixture-of-agents, solver/verifier, routing, and orchestrator/worker patterns—and exploring factuality, quality, latency, and cost trade-offs through reproducible benchmarks.

Rotunda Software

Apr 2022 – Apr 2026

Senior Frontend Engineer · Remote

- Acted as the main frontend reference across the team, supporting developers in UI-related decisions and implementation.
- Led the evolution of the internal UI library (ModUI), improving APIs, simplifying styling systems, and increasing consistency.
- Drove large-scale frontend refactors, including migrations of multiple applications and marketing sites.
- Built interactive documentation and standardized reusable UI patterns and styling conventions, improving onboarding, consistency, and design-to-development handoff.
- Improved frontend tooling and local development workflows, reducing friction for the engineering team.
- Collaborated with backend, design, QA, and marketing to define technical and product solutions, implementing features from Figma designs and proactively identifying UX and implementation improvements.
- Worked within a microservices-based architecture using a custom internal frontend framework, implementing Node.js and Express API endpoints to support frontend features.

BairesDev

Mar 2020 – Mar 2022

Senior Frontend Engineer · Remote

- Worked on Pinterest's Experiments team, implementing and testing React UI variations in the core consumer product to support product experimentation.
- Developed and owned the UI layer of internal advertising reporting tools, defining their information architecture and data presentation.
- Expanded into backend responsibilities, learning Go and implementing APIs to deliver features end to end.
- Collaborated in distributed teams and participated in code reviews and testing.

Mapme

Nov 2016 – Dec 2019

Senior Frontend Engineer · Remote

- Helped evaluate and introduce Vue.js for a full rewrite of a Mapbox GL map-based product, then led the frontend implementation of the redesigned application from scratch.
- Built a component-based architecture with Vue and Vuex, including reusable UI components designed for maintainability and scalability.
- Collaborated closely with the CTO and CEO, translating business needs into practical, user-friendly UI solutions, often without formal designs.

Deviget

Dec 2013 – Apr 2016

Frontend Developer · Remote

- Worked on a large-scale advertising platform (AppNexus).
- Built modular UI components using AngularJS with strong testing practices.
- Contributed to frontend structure improvements and CSS organization.
- Participated in Style Guide development.
- Collaborated in distributed cross-functional teams.
- After AppNexus, built a React-based administration UI for corporate security policies for another client engagement.

Vulsai

2012 – 2013

Frontend Developer · Buenos Aires, AR

- Primary frontend developer across multiple projects.
- Introduced modern CSS tooling (Sass, Less, Compass), improving maintainability and structure of styles.
- Built data visualization interfaces using D3.js.
- Developed self-contained embeddable widgets.
- Collaborated closely with design.

Earlier full-stack experience across four roles building web applications end-to-end with frontend, backend, APIs, databases, and infrastructure.
